

## Crane Manufacturing Company in Oklahoma City, OK

...Power Breezer cooling fans lowered the process cooling time to 30 minutes, dramatically increasing the Company's daily throughput.

### PROFILE

This Company manufactures all-terrain cranes that can quickly move to any jobsite, on and off the road. Suitable for all types of climates and environments, these cranes are compact with excellent maneuverability and designed for one-man operation.

### PROBLEM

As part of the manufacturing process for the cranes, the Company needs to cool tubes coming out of the curing ovens during the paint curing process until they can be handled by hand. The cooling time took 60 to 70 minutes. This significantly slowed down plant productivity and cut into the bottom line.

### SOLUTION

The Company began to use Power Breezer cooling fans from Breezer Mobile Cooling to reduce the cooling time of painted metal tubing.

### RESULTS

The Power Breezer cooling fans lowered the process cooling time to 30 minutes, dramatically increasing the Company's daily throughput. Besides cooling the tubes, Power Breezer cooling fans

are making the workday overall more productive by [managing high temperatures](#), boosting employee morale and increasing efficiency. The Company placed a follow-up order. Today, Breezer Mobile Cooling is a trusted partner in the Company's occupational heat management plan.
