

## E-Commerce Company, Las Vegas, NV and Its Warehouse Locations Within the Greater Phoenix Area in AZ

The employees felt healthier,  
more productive on the job and  
the morale was high.

### PROFILE

This Company operates more than 75 fulfillment centers and 25 sortation centers across North America. It employs 125,000 full-time associates. During peak seasons, the company hires an additional 120,000 workers for its busy logistics and warehouse network. While the larger warehouses have automated climate control, some of the smaller locations (less than 500,000 square feet) only have limited climate control.

### PROBLEM

In one of these smaller locations, the Company had large industrial fans in place to cool the space. An incident occurred where an employee suffered from heat stress and became ill. Corporate was brought to the scene and a Project Manager was tasked with sourcing a more effective cooling solution for their smaller warehouses.

### SOLUTION

The Project Manager traveled to the Phoenix location, where the [Breezer Mobile Cooling](#) Business Development Manager set up a [demonstration](#) to showcase the Power Breezer cooling fan. The premise was that the innovative cooling technology of the Power Breezer cooling fan will reduce the ambient temperature and provide refreshingly cool air to the employees with the overall effect of improving [safety](#) and [productivity](#).

## RESULTS

The demonstration was so successful that the Company rented several units on a long-term rental contract. The Business Development Manager followed up and was given permission to solicit feedback directly from the warehouse employees. The feedback received was extremely positive. The employees felt healthier, more productive on the job and the morale was high.

Breezer Mobile Cooling has since become the Company's trusted [occupational health management partner](#), resulting in additional orders for the Las Vegas, as well as the Chandler location.
